

# Trade Shows & Outreach

We've been all over Trinidad & Tobago spreading the word about energy efficiency and renewable energy. We've done outreach programmes at schools, community centres and trade shows, educating people about energy efficiency and renewable energy. Over the past two years we've set up booths at a variety of events such as

SanCity Green Expo 2012

Divali Nagar 2012, 2013

Scitechkno Fest 2013

NEC Youth Forum

Jericho Project Kids Fun-a-Thon 2013

Energy Conference of Trinidad and Tobago 2014

Launch of Hybrid Camry 2014

POWERGEN Special children sports day 2013

Virtual Educa Symposium 2014

Our dynamic and interactive booths have featured a solar panel display, a wind turbine display, a screen displaying the website [www.myenergytt.com](http://www.myenergytt.com), games, informative posters and branded tokens. At each event we have engaged with young people getting them involved in ways to become more energy efficient and learning about the sources of energy in Trinidad and Tobago.
